FOR IMMEDIATE RELEASE

KYMCO USA Expands Utility ATV Lineup With MXU 150 and MXU 300 Shaft Drive

Inman, SC — KYMCO USA, exclusive USA distributor of KYMCO brand scooters, ATVs and the Venox 250 motorcycle, is expanding its popular ATV lineup with two new models that build on the brand's reputation for utility, reliability and economy. Designed for everything from getting to that special fishing hole or hunting and camping, to carrying equipment and tools around the farm or construction site, these updated models give ATV customers new, expanded choices in the KYMCO line.

"The MXU 300 is our shaft drive offering for more demanding customers," said Bruce Ramsey, KYMCO USA Vice President Sales/Marketing. "And by replacing the current MXer with an MXU 150, we are further meeting the needs of the growing utility ATV market."

The KYMCO MXU 300 Shaft Drive follows in the footsteps of the MXU 250, winner of the People's Choice award at last year's ATV Expo. It boasts a more powerful 270cc, 4-stroke, liquid cooled, SOHC engine, rock-solid shaft drive, and a smooth-shifting CVT automatic transmission. The 300 SD has the same package of features that has made the KYMCO MXU so popular, including a backlit digital dash, heavy-duty front and rear equipment racks, front brush guard, dual A-arm suspension, and disc brakes. Larger Kenda Pathfinder tires — 22x10-10 rear, 22x7-10 front — give this larger KYMCO a substantial 8.25-inch average ground clearance. The KYMCO MXU 300 SD shifter has positive positions for neutral, reverse, and a high/low forward gear. Rugged as the back woods, it is supported by a One-Year Limited Factory Warranty.

The new MXU 150 is economy-minded but built KYMCO-tough — and it comes loaded with the same list of hot utility features in a slightly smaller package. The standard MXU 150 includes multi-purpose racks, a forward/neutral/reverse CVT transmission and all-digital dash (clock, mph, trip, fuel, and odometer). Power is provided by KYMCO's reliable 149cc air-cooled engine, complete with electric start and kick-start backup. Like its bigger brothers, the MXU 150 has a 1 Year Limited Factory Warranty, C.A.R.B. Certification, and a Forest Service approved spark arrestor.

About KYMCO

With headquarters in Taiwan and distribution in 63 countries, KYMCO is a global leader in power-driven products, under the corporate slogan "Power Your Life." Five manufacturing plants in Asia use the latest technology for the engineering and production of reliable engine, chassis, and other components. KYMCO is committed to maximum customer satisfaction and constant innovation, making use of the most advanced CAD/CAE tools to bring superior engineering and design to their products.

KYMCO scooters, motorcycles and ATVs are imported and distributed by KYMCO USA in Inman, South Carolina, where the warehouse, management, and marketing facilities are located. An ever-expanding dealer network currently serves over 500 U.S. locations. Dealer inquiries are invited.
